Coronakrisen rammer nyuddannede akademikere hårdt
Bruttoarbejdsløsheden blandt de akademikere, som har færdiggjort deres uddannelse inden for de sidste 12 måneder – er i august måned på 40 pct. Dette er 3 og 4 procentpoint højere end for henholdsvis ét og to år siden, jf. figuren. Således er godt 1.300 flere nyuddannede ledige i august i år end august sidste år. Herved er godt 9.000 nyuddannede akademikere ledige i august i år.

Coronakrisen har pæriget ledigheden blandt nyuddannede akademikere
Bruttoledigheden blandt nyuddannede akademikere var tilbage i januar og februar end tidligere år. Coronakrisen indtog i marts måned medførte stigende ledighed blandt nyuddannede akademikere, hvorved kurven for disses bruttoledighed har bevæget sig op over kurvene for tidligere år, jf. figuren.

Afsnit 2 – Bruttoledighed i berørte personer og fuldtidspersoner

Blandt akademikere var der i denne måned 22.343 bruttoledige fuldtidspersoner, hvilket er 5.616 flere sammenlignet med samme måned sidste år. Sammenlignet med sidste måned er der tale om et fald på 561 personer.

Blandt mænd er bruttoledigheden i fuldtidspersoner steget med 2.589 personer sammenlignet med samme måned sidste år. Kvindernes ledighed er ligeledes steget, men med 3.980 personer.

Afsnit 3 – Bruttoledige fuldtidspersoner i procent af forsikrede

Den sæsonkorrigerede bruttoledighedsprocent i fuldtidspersoner var i denne måned på 6,4 pct., hvilket er 1,2 procentpoint højere end samme måned sidste år.

I denne måned var bruttoledighedsprocenten i fuldtidspersoner for mænd og kvinder hhv. 5,6 pct. og 7,1 pct. Dette er 1,2 procentpoint højere for mændene og 1,4 procentpoint højere for kvinderne, sammenlignet med samme måned sidste år.

Afsnit 4 – Bruttoledighed i fuldtidspersoner fordelt på alder

Bruttoledighedsprocenten i fuldtidspersoner for personer under 30 år er 2,8 procentpoint højere end samme måned sidste år. Sammenlignes med seneste måned er bruttoledighedsprocenten faldet med 0,4 procentpoint for samme aldersgruppe.

Sammenlignet med samme måned sidste år er bruttoledighedsprocenten for de 30-39 årige steget med 1,1 procentpoint, mens den er steget med 1,0 og 0,7 procentpoint for henholdsvis de 40-49 årige og de 50-59 årige. For personer ældre end 60 år er bruttoledighedsprocenten steget med 1,0 procentpoint sammenlignet med samme måned sidste år.

Afsnit 5 - Dimittendledighed og ledighed efter kandidatalder

Dimittendledigheden ét år efter dimission er vist i figur 5.1. Figuren illustrerer hvor mange personer, som dimitterede præcis ét forinden i en given måned, der fortsat er ledige og hvor stor en andel disse udgør af gruppen, som stadig er forsikret i a-kasserne. Eksempelvis fremgår det, at for gruppen af dimittender i august 2019 er 238 fuldtidspersoner bruttoledige i august 2020, ét år efter dimissionen, og disse udgør 19 pct. af dimittenderne fra august 2019, der fortsat er forsikret.

**Afsnit 6 – Sommerdimittenders bruttoledighed i fuldtidspersoner**

Figur 6.4, 6.5 og 6.6 viser bruttoledighedsprocenten i fuldtidspersoner for sommerdimittender for hhv. ingeniører, magistre og Djøf’ere og sammenligner med ledighedsprocenten de seneste fem år.
Figur 6.1 - Bruttoledighed i fuldtidspersoner for sommerdimittenderne fra 2017-2019

Figur 6.2 - Bruttoledighedsprocent i fuldtidspersoner for sommerdimittenderne fra 2017-2019
Figur 6.3 - Bruttoledigheds pct. i fuldtidspersoner for sommerdimittender opdelt på grupper, årgang 2018-2019

Figur 6.4 - Bruttoledigheds pct. i fuldtidspersoner for sommerdimittender for ingeniører, årgang 2014-2019

Akademikernes ledighedsstatistik august 2020 – Side 19
Figur 6.5 - Bruttoledighedspct. i fuldtidspersoner for sommerdimittender for magistre, årgang 2014-2019

Figur 6.6 - Bruttoledighedspct. i fuldtidspersoner for sommerdimittender for DJØF'ere, årgang 2014-2019

Akademikernes ledighedsstatistik august 2020 – Side 23
Afsnit 8 – Om Akademikernes Ledighedsstatistik

Disse a-kasser afleverer månedligt data til Akademikernes ledighedsstatistik. Der er tidsmæssig overensstemmelse mellem Akademikernes ledighedsstatistik og den officielle månedlige ledighedsstatistik fra Danmarks Statistik.

Akademikernes ledighedsstatistik er udarbejdet efter de samme principper som den officielle ledighedsstatistik fra Danmarks Statistik. Det vil sige, at den er baseret på dagpengeudbetalinger fra a-kasserne. Derudover er der suppleret med oplysninger om uddannelse, dimissionstidspunkt, alder og bopælskommune.

Ledigheden er stærkt påvirket af et årligt sæsonmønster, som kan gøre det svært at vurdere den underliggende udvikling i ledigheden. Derfor sæsonkorrigeres udvalgte tidsserier i publikationen. Dette gøres ved en statistisk metode, der finder det årlige sæsonmønster og trækker dette ud af tidsserien. Dermed opnås den sæsonkorrigerede tidsserie, som vises i publikationen.

I tilknytning hertil skal bemærkes, at indplaceringen af personer i uddannelseskategoriene følger direkte fra uddannelsesoplysningerne om hvert enkelt forsikret medlem. Det betyder at vores afgrænsning af fx ingeniører, magistre og Djøf’ere kan variere i forhold til a-kassernes afgrænsning. Desuden er det ikke muligt at sammenligne alle uddannelsesgrupperne tilbage i tid, idet der med mellemrum er sket enkelte justeringer af uddannelsesgrupperne.
### Oversigt over uddannelsesgrupperingernes indhold
